Hans Gate Management System

To help organizations automate their processes and increase efficiencies in their day to day operations, Hans builds and implements state of the art solutions. Hans’ Gate Management is a powerful gate security management system that includes entry and exit of transport as well as people. The system, once installed, automates all processes linked to entry and exit of any outside entity within your premises, hence increasing the level of security manifolds. Further more. The system is itself secured against unauthorized access via usage of hardware security dongle, which is configurable as per the needs of the organization.
